Publications in this annual statistical series are:

Section 1—SUMMARY (published October 1971)

Section 2—ENROLLMENT (published July 1972)

Section 3—PARTICIPATING PROVIDERS (published October 1971)
- 3.1: Participating Hospitals
- 3.2: Participating Home Health Agencies
- 3.3: Participating Independent Laboratories
- 3.4: Participating Extended Care Facilities

Section 4 — INPATIENT CARE (in preparation)
- 4.1: Short-stay Hospital Utilization
- 4.2: Short-stay Hospitals—Diagnoses and Procedures
- 4.3: Psychiatric Hospital Utilization
- 4.4: Long-stay Hospital Utilization
- 4.5: Extended Care Facility Utilization

Section 5—OUTPATIENT HOSPITAL SERVICES (in preparation)

Section 6—HOME HEALTH SERVICES (in preparation)

Section 7—PHYSICIANS' AND OTHER MEDICAL SERVICES (in preparation)

Persons on the ORS health insurance mailing list will be notified when the various sections are available for purchase through the Superintendent of Documents, U.S. Government Printing Office.

Foreword

WITH THE enactment of the health insurance program for the aged (Medicare), it became possible for the first time to organize a continuing information system to report the use of health care services by older Americans. Since Medicare began, one of the basic tasks has been to process and pay claims for covered medical services submitted by or on behalf of all aged persons who are entitled to hospital insurance benefits and those voluntarily enrolled for supplementary medical insurance benefits. From this operation come data on the amount, kind, and cost of medical services used by the aged.

This report is one of a series of publications designed to disseminate such data on a regular basis. It provides detailed statistical information on the characteristics of persons insured under Medicare. The series includes other reports on the number and characteristics of participating providers and on the utilization of medical care services. A listing of these reports appears on the inside cover. The reports are intended to give a comprehensive account of the amounts reimbursed under the program, the kinds of services paid for, and the variations in utilization and reimbursement by age, race, and sex of the beneficiary, as well as his place of geographic residence. Such data can provide new insights into the patterns of medical care for persons 65 and over. A fuller understanding of present practice can contribute to improved health services not only for the aged but for the general population as well.

Many individuals in the Social Security Administration have assisted with the development of this series. The preparation of the reports is a function of the Division of Health Insurance Studies of the Office of Research and Statistics under the supervision of Howard West, director, and Aaron Krute, deputy director. Important contributions for the tabulation and presentation of the statistical content of this report were made by Theodosia Rasberry and Robert J. Butler of the Statistical Processing and Procedures Branch and Joyce B. Ragin of the Program Statistics Branch of that division. Text preparation was the responsibility of Martin Ruther of the Program Statistics Branch. Special acknowledgments for computer services are made to the Division of Health Insurance Statistical Data, Bureau of Data Processing.

IDA C. MERRIAM,
Assistant Commissioner for Research and Statistics.

Notes		2–1
2.1	Persons enrolled as of July 1, for health insurance, by type of coverage, age, race, sex, region, division, and State of residence	2–2
2.2	Persons enrolled as of July 1, for health insurance, by type of coverage and age, for the United States, regions, divisions, and by metropolitan-nonmetropolitan residence	2–20
2.3	Persons enrolled as of July 1, for health insurance, by type of coverage, for States, Puerto Rico, Virgin Islands, by metropolitan-nonmetropolitan residence and by county	2–22
2.4	Persons enrolled as of July 1, for health insurance in the United States, by type of coverage, race, and sex, for population size groups of standard metropolitan statistical areas, and for each area of 500,000 or more in 1965	2–44
2.5	Persons enrolled for health insurance, by type of coverage, age, race, sex, and month of coverage	2–47
2.6	All persons ever enrolled during 1967 for hospital insurance and/or medical insurance, by age, race, sex, region, division, and State of residence	2–51

THIS PUBLICATION is a section of a statistical report series produced from Medicare program records. Presented on a calendar year basis, describing services rendered in the year, the series includes sections on enrollment, characteristics of providers, inpatient care in hospitals and extended care facilities, outpatient hospital services, home health services, physicians' and other medical services, and overall summaries.

The primary objective of these reports is to provide data required to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, extended care facilities, home health agencies, and independent laboratories to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the program services utilized and the demographic characteristics of each individual recorded in the health insurance entitlement master file.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available data. First, data are collected and maintained on an individual basis so that the beneficiary and his medical experience under the program form the basic unit. Second, records for each bill paid under the program and, for a sample of beneficiaries, records of diagnoses and surgical procedures are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are centrally prepared.

THE BASIC RECORDS

The statistical system is based on five related computer-tape records: the health insurance entitlement master file, provider record, hospital insurance (Part A) utilization record, medical insurance (Part B) payment record, and the record containing information from medical insurance bills for a 5-percent sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE ENTITLEMENT MASTER FILE

The health insurance entitlement master file identifies each aged person eligible for health insurance benefits and indicates whether he is entitled to hospital benefits, to supplementary medical insurance benefits, or to both of these benefits.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program and therefore serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, extended care facility, and independent laboratory must apply for participation in the hospital insurance program in order to be reimbursed for services provided. Data included on the application forms have been recorded in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him under the "benefit period" concept.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration for recording in the central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days remaining during the "benefit period."

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When approval for payment has been made, the intermediary forwards the claim to the Social Se-

curity Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Copies of admission and billing forms are handled in a comparable manner by home health agencies and extended care facilities. The outpatient billing form is also transmitted to the Social Security Administration for recording in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and extended care facilities that is needed to administer the "benefit period" provision is recorded in the central record. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or extended care facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting tape record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to Part A utilization.

PAYMENT FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills having allowed charges exceeding $50 during a calendar year period.

For the insured population, carriers need to know from a central source that the deductible has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable record of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

The payment record also contains selected items of information needed to supply an efficient basis for drawing samples of the bills. These items provide a sampling frame that may be used to draw additional samples designed to obtain specific information not furnished reliably by the basic sample of enrolled persons under the medical insurance program.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data and a sampling frame for efficiently drawing additional samples of bills, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a continuous 5-percent sample of all enrolled persons. Intermediaries have been given specific combinations of digits of the health insurance claim number to be used in selecting the 5-percent sample, which is a sub-sample of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physician's billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for the specific service.

All of the bills of persons in the 5-percent sample to or for whom payment is made under the program, including those used to meet the annual $50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the $50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.[1]

For hospital-based physicians who have authorized the provider to collect the fee for their services, the provider billing for patient services by physicians form is used. This form is completed for each patient. It includes descriptive information on the date and place of each service, the diagnoses, procedures, and the charges. These bills are received centrally for the 5-percent sample of persons enrolled for supplementary medical insurance.

Characteristics of the Enrolled Population, 1967

This report presents data on the characteristics of the population enrolled in the Medicare program in 1967. It also discusses changes in enrollment during the program's first year. The general tables present data by age, race, sex, and by State and county of residence, comparable to the tables for 1966.[1] New tables are also included, showing the enrollment by month, and the total number of persons enrolled at any time during 1967. Most of the data were tabulated as of July 1, 1967 in order to provide a population base for measures of utilization of medical care services under the Medicare program; for 1966, October 1 was the comparable midperiod base.

Almost all persons aged 65 and over are entitled to hospital insurance.[2] On July 1, 1967, a year after the Medicare program went into effect, 19.5 million persons aged 65 and over were enrolled for hospital insurance (HI) benefits. Of this number, 17.9 million had voluntarily enrolled for supplementary medical insurance (SMI) benefits (table A).

Table A.—Persons enrolled for health insurance, and percentage change, by race and sex, July 1, 1966–July 1, 1967
[In thousands]

Race and sex	Hospital insurance			Medical insurance		
	Number enrolled		Percent change	Number enrolled		Percent change
	July 1, 1966	July 1, 1967		July 1, 1966	July 1, 1967	
All persons	19,082	19,494	2.2	17,736	17,893	0.9
Men	8,133	8,243	1.4	7,534	7,547	.2

White	17,042	17,385	2.0	15,938	16,124	1.2
Men	7,357	7,424	.9	6,860	6,864	.1
Women	9,685	9,961	2.9	9,079	9,260	2.0
All other races	1,445	1,496	3.5	1,264	1,245	—1.5
Men	656	673	2.6	571	560	—1.9
Women	789	823	4.3	693	684	—1.2
Race unknown	596	613	2.8	534	524	—1.8
Men	120	146	21.6	104	122	17.6
Women	476	467	—1.9	430	402	—6.4

The growth in the number of persons enrolled between 1966 and 1967—2 percent—reflected the excess of persons aging into the program over deaths of enrolled persons in that year. Since the present age distribution of the population under age 65, and the death rate among the population 65 years and over, are the only components that determine the future size of the HI population, its magnitude can be predicted as long as there is no change in the death rate. The Bureau of the Census has estimated the size of the population through the year 2020; these estimates show a continuing rise in the number of persons aged 65 and over.[3]

On the other hand, enrollment in the SMI program is voluntary, and requires payment of a monthly premium by or on behalf of the beneficiary. The increase in SMI enrollment between 1966 and 1967 was less than half that for HI. The SMI enrollment expressed as a proportion of persons enrolled for HI was 93.8 for the United States in 1966, but fell to 92.7 in 1967 owing chiefly to the failure of a small proportion of new HI enrollees to participate in the SMI program. Termination of enrollment for 42,000 persons who failed to pay the SMI premium also contributed to the decline.

Within the population aged 65 and over, the median age of persons enrolled for HI on July 1, 1967 was 72.9 years, almost the same as for 1966; but the proportion of the total that is 75 years and over increased somewhat from 37.2 percent in 1966 to 37.8 percent a year later. According to estimates published by the Bureau of the Census, this proportion will continue to rise until 1975.[3]

HI Enrollment

Type of entitlement.—Persons enrolled in the HI program may be described according to the characteristics recorded in the Health Insurance Entitlement (HIE) master file—age, race, sex, mailing address and type of entitlement. About 90 percent of the persons entitled to HI benefits were receiving or were eligible for social security benefits (table B), and 4 percent were receiving or entitled to receive railroad retirement benefits. Some persons were entitled to both social security and railroad retirement cash benefits on the basis of earnings under both programs (286,000). These individuals are reported both as entitled to social security benefits and as entitled to railroad retirement benefits, but they are counted only once in the figures in table B for all enrolled persons. The balance of the enrolled population (7.4 percent) was not receiving cash benefits under either social security or railroad retirement. This group is entitled to HI coverage under the transitional provisions of the law. Compared with 1966, the figures reflect the transfer of persons benefited under the provisions of Public Law 89-368 (known as the Prouty Amendment) from the category "other enrolled persons" in July 1966 to "persons entitled to social security benefits" because they became entitled to a monthly cash benefit in October 1966.[1] In table B for July 1967, about 875,000 of these persons are included under social security beneficiaries, even though they had insufficient work credits to be insured under social security.

The characteristics of the transferred persons differed from that of the large majority of the "social security" beneficiaries. They are like "other enrolled persons," 76 percent of whom in July 1966 were women and 21 percent of whom were reported as of unknown race. The transferred group served to increase the proportion of women among those entitled to social security benefits from 55 percent of the total in 1966 to 57 percent in 1967; and persons whose race was not reported or unknown, from 0.1 percent to 1.7 percent.

Except for the proportion of persons with race not reported, there are only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries (table B). Race was not reported for 10 percent of the railroad retirement beneficiaries in contrast to the 2 percent noted for the social security beneficiaries.

The group remaining in 1967 in the classification "other enrolled persons" consists in large part (73 percent) of women. Seventeen percent of the entire group are reported as members of "all other races," and almost the same proportion as "race unknown."

Table B.—Persons enrolled for hospital insurance, by type of entitlement, age, race, and sex, July 1, 1967
[In thousands]

[1] Persons entitled to social security and railroad retirement cash benefits (286,000) are counted in each category separately, but only once in total.

Table C.—Percentage distribution of persons enrolled for hospital insurance, by age, race, and sex, July 1, 1967

Race and sex	Aged 65 and over	65, 66	67, 68	69, 70	71, 72	73, 74	65–69	70–74	75–79	80–84	85 and over
All persons	100.0	14.2	13.3	12.5	11.7	10.6	33.8	28.4	20.0	11.3	6.5
Men	42.3	6.5	6.0	5.5	5.0	4.5	15.2	12.2	8.2	4.4	2.3
Women	57.7	7.7	7.3	7.0	6.6	6.1	18.6	16.2	11.8	6.9	4.2
White	89.2	12.6	11.9	11.2	10.5	9.6	30.2	25.6	18.1	10.0	5.4
Men	38.1	5.7	5.3	4.9	4.5	4.1	13.5	11.0	7.5	4.0	2.0
Women	51.1	6.9	6.6	6.3	6.0	5.5	16.6	14.6	10.5	6.0	3.4
All other races	7.7	1.2	1.2	1.0	.9	.8	2.9	2.2	1.4	.7	.5
Men	3.5	.6	.6	.5	.4	.3	1.4	1.0	.6	.3	.2
Women	4.2	.6	.6	.6	.5	.4	1.5	1.2	.8	.4	.3
Race unknown	3.1	.4	.2	.2	.2	.2	.8	.5	.6	.6	.6
Men	.7	.2	.1	.1	.1	.1	.3	.1	.1	.1	.1
Women	2.4	.2	.1	.2	.1	.2	.5	.4	.5	.5	.5

Age, race, sex.—The demographic characteristics of the enrolled population (HI) were about the same in 1967 as in 1966 (table C). There were more women enrolled than men at every age, and the ratio of women to men increased with advancing age reflecting the greater longevity of women.

By race, 89 percent of the enrolled population was classified as white; 8 percent as of other races; and for 3 percent, race was not reported (table C). The small group of HI enrollees for whom race was not known was mostly women. The median age of the white population in 1967 as in 1966 was greater than for all other races; and the median age of women was greater than that of men.

Characteristic	Median age	
	1966	1967
Total HI enrollees	72.8	72.9
Men	72.4	72.4
Women	73.1	73.2
White	72.7	72.8
Men	72.4	72.5
Women	72.9	73.1
All other races	72.1	72.2
Men	71.8	71.9
Women	72.4	72.5
Race unknown	78.1	77.2
Men	75.5	72.4
Women	78.7	78.5

Geographic distribution.—When the population entitled to hospital insurance in 1967 (table 2.1) is distributed by geographic region and division and compared with the same distribution for 1966 little difference in population characteristics is noted.[1] In 1967, as in the previous year, less than a year separated the lowest and highest median age of the population by division. Half of the persons aged 65 years and over in the West North Central States were over 73.3 years and half of those in the South Atlantic States were over 72.5 years. Women comprise the majority of the population in every area.

While the age distribution by sex differs, the distribution for each sex is similar in almost all geographic divisions (table D). With respect to all older persons, the Middle Atlantic is the most populous division, containing 20 percent of the total population and 21 percent of the white population (table E). Among all other races, almost 60 percent reside in the three divisions that make up the South.

Almost two-thirds of the persons covered by hospital insurance reported their place of residence to

Region and division	Median age	
	1966	1967
United States	72.8	72.9
Northeast	72.7	72.8
New England	73.0	73.1
Middle Atlantic	72.6	72.8
North Central	73.0	73.1
East North Central	72.8	72.9
West North Central	73.2	73.3
South	72.6	72.7
South Atlantic	72.4	72.5
East South Central	72.8	72.8
West South Central	72.7	72.7
West	72.8	72.9
Mountain	72.8	72.8

be a metropolitan county (table F). The proportion of those persons living in metropolitan counties showed considerable variation according to geographic area. The South shows relatively the largest nonmetropolitan population and the Northeast the smallest. Three-quarters of the HI enrollees who lived in a metropolitan county resided in the standard metropolitan statistical areas having a population of 500,000 or more in 1965 (table 2.4).

Table F.—Percentage distribution of persons enrolled for hospital insurance, by region, division, and metropolitan or nonmetropolitan county of residence, July 1, 1967

Region and division	Metropolitan counties		Nonmetropolitan counties
	With central city	Without central city	
United States	50.8	12.2	36.3

Mountain	45.7	5.1	48.2
Pacific	75.4	5.9	18.1

The increase in HI enrollment between July 1, 1966 and 1967 was observed in every area of the country. The largest increase by region was 3.4 percent in the South, followed in rank order by 2.9 percent in the West, and 1.3 and 1.2 in the North Central and Northeastern States, respectively. Changes in the Medicare population of an area can arise through differences in the numbers of persons aging into the program, variations in death rates among persons 65 years and over, and interstate migration of the population enrolled in the program. There is some evidence that about 1 percent of persons aged 65 and over migrated during the fiscal year 1967, chiefly from the Northeast and North Central States to southern and western States.[4]

[4] William J. Nelson, "Interstate Migration of Aged Beneficiaries." Social Security Administration, Office of Research and Statistics, Research and Statistics Note No. 3, February 25, 1970. The study refers only to those aged Social Security beneficiaries receiving benefits on June 30, 1967.

Increases in HI enrollment by State varied from a rise of 6.6 percent to no change at all, as shown below:

Percentage change, 1966 to 1967	Number of States[1]	
	Hospital insurance	Medical insurance
Total	51	51
—5.9 to —4.0	—	1
—3.9 to —2.0	—	2
—1.9 to 0.0	—	8
0.0 to 1.9	27	32
2.0 to 3.9	18	5
4.0 to 5.9	3	3
6.0 to 7.9	3	—

[1] Includes District of Columbia.

The enrollment for the States of Florida, Nevada, and Arizona all increased by more than 6 percent. For Iowa, the growth was less than 1 percent, and for the District of Columbia, enrollment was the same in both years. The migration study mentioned earlier observed that in the fiscal year 1967 there was a net outmigration of beneficiaries aged 65 and over from the District of Columbia to the suburbs.[4]

SMI Enrollment

By July 1, 1967, the number of persons enrolled for SMI had increased to 17.9 million, or almost 1 percent more than the enrollment a year earlier. For the white population, the increase was 1.2 percent; but, for persons of other races, in contrast to the rise in HI enrollment, the SMI enrollment declined by 1.5 percent.

Age, race, sex.—There was little difference in the distribution by race, sex, and median age of persons enrolled under the HI and the SMI programs. This is to be expected since the number enrolled for SMI benefits was almost 92 percent of those entitled to HI coverage (table G). (SMI enrollment included 27,000 persons not entitled to HI benefits because they were covered by the Federal Employees Health Benefits Act of 1959).

The proportion of the total HI population enrolled in SMI, however, differed greatly as between races. For the white population, 92.7 percent of the persons enrolled for HI were also enrolled for SMI, almost 10 percentage points more than for all other races. The excess for whites persisted in every age and sex group. For men and women as a whole, the proportion of SMI to HI enrollment was nearly identical. Except

for the youngest and oldest age groups, the variation in the percentage enrolled in SMI by age was small. By 2-year age groups, the enrollment percentage, 87.3, was lowest for persons aged 65 and 66 years and highest—93.2 percent—for those aged 69 and 70 years. It is likely that many persons on attaining age 65 do not enroll in SMI because they are protected by employment-related medical insurance coverage.

Geographic distribution.—On July 1, 1967, among HI enrollees residing in the United States nearly 93 percent were enrolled in SMI (table H), almost one percentage point higher than for all persons covered by HI (table G). The lower rate among the total population resulted from the inclusion of two groups of SMI-eligible persons with low participation residing in outlying areas such as Puerto Rico (see table 2.1) and in foreign countries. Persons 65 and over living in foreign countries may not ordinarily be paid Medicare benefits for services furnished in those countries. Circumstances that influence enrollment in SMI in outlying areas—average income, access to local provisions for medical care, etc.—may vary considerably from those prevailing in the United States.

For all persons in the United States, the percent of HI enrollees in the SMI program varied somewhat by geographic division. It was highest—95 percent—in the New England States and lowest—90 percent—in the East South Central States.

The decline in SMI enrollment for 1967 affected the proportions shown in table H for every area, and for both race groups. The declines reported for all other races were substantially larger than for the white population.

Persons Newly Enrolled and Persons Terminated

A total of 1,540,000 persons was newly enrolled under HI during 1967 (table J), an average of 128,000 persons a month. Most additions to the rolls were persons who had just attained age 65. The provisions for HI coverage also permit additions to the HI rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. There were 64,000 persons aged 67 and over whose HI coverage began in 1967. By the end of 1967, late registration of persons 67 years and over was negligible.

An average of 116,000 persons was added to the SMI enrollment each month of 1967, or about 90 percent of HI additions. As noted for HI, these persons generally aged into the program. But during the entire year, there were also 96,000 persons aged 67 and over whose SMI coverage started in 1967 when their State of residence bought SMI coverage for public assistance recipients.

In general, during 1967 active efforts were made to identify and add to the SMI rolls, eligible persons who were enrolled in various public assistance programs.

[1] PA recipients entitled to OASDHI and RRB were covered under State "buy-in" agreements, except in Massachusetts and Wisconsin. Coverage was effective July 1, 1966, except in California where coverage of beneficiaries began Jan. 1, 1967.
[2] Definition of title numbers: 1—old-age assistance; 4—aid to families with dependent children; 10—aid to the blind; 14—aid to permanently and totally disabled; and 16—aid to aged, blind, or disabled.
[3] Titles 4, 10, and 14 covered effective July 1, 1967.
[4] Title 4 covered effective Nov. 1, 1967.
[5] Terminated July 31, 1967.

The year before, 25 States had obtained SMI coverage for those recipients 65 years of age and over by electing to enroll them under SMI and pay their SMI premiums (table K). The States of Georgia and Kansas joined the "buy-in" program in October 1967. In this year, California, Iowa, and Oklahoma enlarged the number of aged public assistance beneficiaries eligible for coverage. Over 300,000 persons in California had their SMI premiums paid under this program, more than in any other State (table L). The highest proportions of "buy-ins" were in Arkansas, Oklahoma, Georgia, and Texas, where the State had paid the premiums for more than a quarter of the SMI enrollees.

Eligible persons who fail to enroll for SMI during their initial enrollment period may enroll later in a general enrollment period. There were no additions to SMI rolls in 1967 as a result of the general enrollment period because coverage did not begin until July 1, 1968.

Terminations.—During 1967, HI coverage was terminated for over 1 million persons who died (table M). Since termination from HI coverage occurs in the month following death, terminations in 1967 include deaths in the months of December 1966 through November 1967.[5]

[5] In the calendar year 1967, 1,114,000 deaths among HI enrollees were recorded. Owing to differences in the population covered, and in the source of the report of age at death as well as possible delays in recording deaths in the SSA file, these figures do not correspond exactly to data on deaths published by the Division of Vital Statistics, National Center for Health Statistics. A complete analysis of differences has not been made for 1967. For a comparison of death rates in 1968 based on SSA data with rates published by the National Center for Health Statistics, see Francisco Bayo, "Mortality of the Aged" *Transactions*, Society of Actuaries, XXIV (1972) (in press).

Table L.—Persons enrolled for medical insurance at any time during 1967 under State "buy-in" agreements and percent of total enrolled, by State of residence

State of residence[1]	Number	Percent of total ever enrolled[2]
All States	[3]1,370,609	11.2
Arizona	15,056	10.5
Arkansas	72,375	30.1
California	328,283	18.4
Colorado	41,468	21.6
Connecticut	9,360	3.2
Florida	85,256	10.0
Georgia	97,770	26.5
Indiana	23,534	4.6
Iowa	28,541	7.7
Kansas	19,119	6.9
Maine	13,631	10.9
Massachusetts	15,950	2.4
Minnesota	31,692	7.5
Montana	4,814	6.7
Nebraska	15,941	8.4
New Hampshire	5,124	6.1
New Jersey	16,130	2.3
New York	85,283	4.2
Oklahoma	88,840	29.5
South Carolina	25,440	13.1
South Dakota	6,410	7.6
Tennessee	55,306	14.2
Texas	256,087	26.1
Vermont	4,914	9.6
Virginia	12,663	3.4
Wisconsin	9,108	1.9
Wyoming	2,497	7.9

[1] Based on data recorded as of July 1, 1970. State of residence is not necessarily the State that bought coverage.
[2] Percent of total population ever enrolled in HI and/or SMI as shown in table 2.6.
[3] Includes 17 persons whose address is in a State not having a "buy-in" agreement during 1967.

SMI.—Persons receiving monthly cash benefits may terminate their enrollment only in a general enrollment period. Terminations requested in the enrollment period October 1, 1967–March 31, 1968, became effective in 1968, and are therefore not shown in this report. Other persons may terminate their enrollment at any time by not paying the premiums. In 1967, such self-terminations could be made only by the 1.5 million persons who were *not* receiving a cash payment from which the premium was automatically deducted. Nearly 42,000, or 3 percent of this group, terminated their SMI coverage by this means.

Table M.—Persons whose health insurance was terminated during 1967 by race, sex, and reason for termination

Race and sex	Hospital insurance[1]	Medical insurance: Total	Death	Nonpayment of premium
All persons	1,097,079	1,051,541	1,009,856	41,685
Men	566,635	537,173	521,230	15,943
Women	530,444	514,368	488,626	25,742
White	967,324	920,507	897,407	23,100
Men	511,035	483,276	473,587	9,689
Women	456,289	437,231	423,820	13,411
All other races	83,753	85,150	71,894	13,256
Men	44,662	43,343	38,432	4,911
Women	39,091	41,807	33,462	8,345
Race unknown	46,002	45,884	40,555	5,329
Men	10,938	10,554	9,211	1,343
Women	35,064	35,330	31,344	3,986

[1] All hospital insurance terminations were deaths.

Source of Data

The HIE master file.—The data on age, sex, race, and place of residence of the enrolled population in this report are from the health insurance entitlement (HIE) master file. Changes or corrections in the characteristics of the beneficiaries, new enrollments,

and terminations are entered into the file at periodic intervals. Data for 1967 are from the HIE master file summarized on January 3, 1969, with one exception. Data for table L, "Persons enrolled for SMI at any time during 1967 under State buy-in agreements," were summarized as of July 1, 1970.

Place of residence.—The beneficiary's place of residence is defined as his mailing address but this is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIE master file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown.—There were nearly 11,000 people with unknown residence recorded in the HIE file in 1967 (table 2.6). Most of these entries were the result of processing errors with respect to codes for States or foreign countries. In addition, the number of enrollees whose county of residence was unknown appears in table 2.3 for each State. These were addresses from which the county could not be determined or possibly processing errors.

Race unknown.—On July 1, 1967, the number of HI enrollees without a designation of race was 613,000 or 17,000 more than a year earlier. This increase was the result of unresolved data exchange procedures between the SSA and the Railroad Retirement Board. The master records of the Board do not contain a designation of race. At the start of the Medicare program and at the request of the SSA, the Board provided Medicare with race information. Since then no such information has been obtained for railroad retirement beneficiaries newly enrolled in the Medicare program. The following table summarizes changes by type of entitlement of HI enrollees classified "race unknown" during the first year of Medicare:

[In thousands]

Type of entitlement and sex	Number enrolled		Net change, 1966 to 1967
	July 1, 1966	July 1, 1967	
Total race unknown [1]	596	613	17
Men	120	146	26
Women	476	467	—9
Entitled to railroad retirement benefits	35	84	49
Men	9	41	32
Women	26	44	18
Entitled to social security benefits	11	293	282
Men	6	44	38
Women	5	248	244
Other enrolled persons	551	238	—313
Men	105	61	— 44
Women	446	177	—269

[1] Persons entitled to social security and railroad retirement cash benefits are counted in each category separately, but only once in the total.

The net increase of 17,000 persons for whom race was not reported between July 1, 1966 and July 1, 1967, resulted from the addition of 49,000 unknowns among those entitled to railroad retirement benefits, and the drop of 31,000 among the balance of the population. Men accounted for an increase in unknowns of 26,000, while unknowns among women decreased by 9,000. As shown in the table above, the number of social security beneficiaries of unknown race increased by 282,000 between July 1, 1966 and July 1, 1967. Conversely, the number of unknowns among "other enrolled persons" decreased by 313,000 during the same period. A large part of both these changes resulted from the transfer of persons affected by the enactment of Public Law 89-368 (the Prouty Amendment) to "social security beneficiaries" (see HI enrollment section). The "unknowns" were concentrated among women 75 years of age and over. This group accounted for almost 60 percent of the total of 600,000.

Provisions of the Law

The health insurance program for the aged, commonly called Medicare, was enacted on July 30, 1965, as Title XVIII of the Social Security Act, and became effective on July 1, 1966. The program, a part of the 1965 amendments (Public Law 89-97), makes available two separate but coordinated insurance coverages—hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium. Changes in the program effective in 1968 were incorporated in the 1967 amendments to the Social Security Act (Public Law 90-248).

Hospital Insurance Program

The hospital insurance program (Part A of Medicare) pays for a large portion of the costs of hospital and related post-hospital services. It is financed on a self supporting basis through a tax on a portion of current earnings, paid by employees, employers, and self-employed persons. The proceeds of this tax are placed in the Hospital Insurance Trust Fund, from which reimbursements for benefits and administrative expenses incurred under the program are paid. The trust fund is reimbursed from general tax revenues for the costs of providing coverage for persons who qualify for hospital insurance but who are not eligible for monthly social security or railroad retirement benefits.

BENEFITS

Inpatient hospital benefits.—The program covers the cost of covered services in a participating hospital for up to 90 days in a "benefit period" (a period beginning with the first day of hospitalization and ending 60 days after discharge from a hospital or a skilled nursing home). Of the 90 days, full payment is made for the first 60 days of hospitalization after a deductible of $40 has been paid. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of $10 a day. The program provides the same benefits for emergency services rendered in a nonparticipating hospital.

Inpatient tuberculosis and psychiatric hospital services are also covered. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a tuberculosis or psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 90-day period immediately prior to his eligibility are counted against his 90 days of entitlement in that benefit period.

Covered hospital services include hospital room and board in accommodations containing from two to four beds, nursing services except for private-duty nursing, drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. Coverage under the hospital insurance program does not include the services of physicians (including radiologists, anesthesiologists, pathologists, and physiatrists) except for those services provided by interns or residents in training under approved teaching programs in a hospital.

The cost of the first three pints of blood furnished a patient during a benefit period is a deductible amount unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

Outpatient hospital diagnostic benefits.—These benefits cover the cost of tests and related services that are ordinarily furnished by a participating hospital to its outpatients for the purpose of diagnostic study. Such services are covered subject to a $20 deductible and 20-percent coinsurance for diagnostic services furnished the beneficiary by the same hospital during a 20-day period. The deductible may be applied towards the $50 annual medical insurance deductible.

Post-hospital home health care benefits.—These benefits cover the cost of visiting nurse services and related home health services for as many as 100 visits in a year following the patient's discharge from a hospital or extended care facility, provided he has been confined for at least 3 consecutive days in a hospital. A home health plan must be developed by a physician and implemented within 14 days after the patient's discharge from the hospital or extended care facility.

Extended care facility benefits.—The program pays for the reasonable cost of all covered inpatient services in participating extended care facilities (ECF) for up to 100 days of such care in any benefit period, following discharge from a hospital after a stay of 3 consecutive days or more, and admission to an ECF within 14 days of discharge. Full payment is made for

the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance of $5 a day.

Supplementary Medical Insurance Program

The supplementary medical insurance program (Part B of Medicare) provides coverage of physicians' services, additional home health services, and a variety of other health services. Individuals 65 years of age and over may enroll in the program regardless of whether they are eligible for social security retirement benefits. The insured's monthly premiums are matched by the Federal Government and paid into the Supplementary Medical Insurance Trust Fund, which reimburses carriers for benefits and administrative expenses incurred under the program.

BENEFITS

The SMI program pays for 80 percent of the allowed charges for covered physician services and other medical services after the patient has met a deductible of $50 during a calendar year. However, payment for outpatient psychiatric physician services is limited to the lesser of $250 or 50 percent of the allowed charges in any year after the $50 deductible has been met. The sum and percentage are derived from the statutory provision which permits an incurred expense for out-of-hospital treatment of mental illness of only $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges can be reimbursed, the effective maximum becomes $250.

To preclude the possibility of having to meet a deductible twice in a short period of time, a "carryover" provision is applied. Accordingly, covered expenses that are incurred in the last quarter of the year and counted toward the deductible in that year are also credited toward the deductible for the following year.

Covered under the program are such benefits as physicians' services, including home, hospital, and office visits; services and supplies, including drugs and biologicals that cannot be self-administered, that are furnished as a part of a physician's professional service, most commonly in his office, and either rendered without charge or included in the physician's bills; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-ray, radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; rental of durable medical equipment, including iron lungs, oxygen tents, hospital beds, and wheelchairs used in the patient's home (including an institution used as his home); ambulance service in cases where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ, including replacement of such devices; leg, arm, back, and neck braces, and artificial legs, arms, eyes, including replacement if required because of a change in the patient's physical condition; and 100 home health visits during a calendar year—these visits being independent of those provided under the hospital insurance program.

Eligibility

The hospital insurance program.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons in this age group who are entitled to monthly social security cash benefits or payments from the railroad retirement system, regardless of whether they have applied for these cash benefits. A person could apply for hospital insurance protection even though he did not qualify for either social security cash benefits or a railroad retirement annuity if (1) he had attained age 65 by July 1, 1966, (2) he would become 65 years of age before 1968, or (3) he would attain age 65 after 1967 with not less than 3 quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1965 and before the year in which he would attain age 65; however, hospital insurance protection could not go into effect until the individual attained age 65. These three classes of individuals were "deemed insured" under a special transitional provision.

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions. Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retoractive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary medical insurance.—Persons entitled to benefits under the hospital insurance program (Part A), retired Federal employees aged 65 or over, and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—An eligible person may enroll during the initial enrollment period, which begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective with the month in which he attains age 65: if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months

after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

A general enrollment period was set between October 1, 1967, and March 31, 1968, for those who did not enroll in the regular enrollment period, with comparable periods set to occur in every odd-numbered year from October through December. A person who enrolls during a general enrollment period may receive benefits starting on the first of July following the general enrollment period. An eligible individual must enroll within 3 years after the close of the first enrollment period in which he was entitled to enroll in order to become a beneficiary.

An initial general enrollment period was set up at the beginning of the program for people who had attained age 65 before March 1, 1966. This enrollment period began September 1, 1965, and ended on May 31, 1966, for coverage to begin with the initiation of the program on July 1, 1966.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs if the State requests such a State-Federal enrollment agreement to be established and pays the necessary premiums.

Enrollment terminates with the beginning of the month following the month of death. In general, railroad retirement beneficiaries and individuals entitled to monthly cash social security benefits may terminate their enrollment voluntarily by notifying the Social Security Administration in writing during a general enrollment period of the desire to withdraw from the program. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of the desire to withdraw from the program. An individual who previously has terminated his enrollment may re-enroll only in a general enrollment period beginning within 3 years of the date his previous enrollment had terminated. Re-enrollment, however, is allowed only once.

Financing the Program

Hospital Insurance.—The hospital insurance program is financed on a long-range, self-supporting basis through a separate schedule of increasing tax rates on the first $6,600 of earnings in employment covered under the Social Security Act with the same rate for employees, employers, and self-employed persons. The earnings base was raised in 1968 to $7,800. This rate was 0.35 percent in 1966, 0.50 percent for 1967, and is scheduled to increase until it is 0.90 percent in 1987 and thereafter. The proceeds of this tax and that collected from the railroad retirement system are placed in a Hospital Insurance Trust Fund[1] from which reimbursements for all benefits and administrative expenses incurred under the hospital insurance program are paid. The Hospital Insurance Trust Fund is reimbursed from general tax revenues for the costs of providing coverage for the almost 2½ million persons who qualify for hospital insurance but who are not entitled to monthly social security or railroad retirement benefits, that is, those "deemed insured."

Supplementary Medical Insurance. Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund[2] by those persons enrolled for supplementary medical insurance, (or on their behalf) and a matching amount is paid from general revenues by the Federal Government.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance, and for individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

The premium rate of the supplementary medical insurance program may be adjusted annually if medical costs rise. The law requires that the rate be set at an amount that will generate income to the fund sufficient to cover benefit payments and administrative costs incurred during the year. The monthly premium was set at $3 beginning with July 1966 and remained at this level until April 1968 when it was raised to $4 per month.

States are permitted to enter into agreements with the Secretary, based on a request made before January 1, 1970, to buy in—that is, to pay the medical insurance premiums—for public assistance recipients aged 65 or over who were receiving money payments under an approved public assistance plan and for all aged persons eligible to receive medical assistance under an approved Title XIX plan.

Administration of the Program

Hospital Insurance.—Under the hospital insurance plan, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

[1] 1967 Annual Report of the Board of Trustees of the Federal Hospital Insurance Trust Fund, U.S. House of Representatives Document Number 64.

[2] The 1967 Annual Report of the Board of Trustees of the Federal Supplementary Medical Insurance Trust Fund, U.S. House of Representatives Document Number 66.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. The intermediary makes payments to providers for covered items and services on the basis of reasonable cost determinations and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider records. Generally speaking, the Social Security Administration utilizes the services of the hospital insurance intermediary in making payments for home health and outpatient hospital services covered under the supplementary medical insurance program.

Payment may be made for a beneficiary for covered emergency inpatient hospital services where the hospital is not a participating facility and agrees not to charge the beneficiary for covered services. Such a hospital may be outside the United States if it is more accessible than the nearest hospital in the United States adequately equipped to treat the patient.

Requests for payment for covered services must be signed by the beneficiary (or someone for him, if he is unable to do so). Payments are made on the basis of reasonable costs for these services to participating providers of services, that is, hospitals, extended care facilities, and home health agencies, who have been certified for participation.

In some instances, hospitals may bill for physician services rendered to inpatients. In these cases, interim payment is made from the HI trust fund. Subsequently, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews the claims for payment and pays the provider. Actual payment is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payments can be made to Federal providers of services except for emergency services, unless this provider serves as a community institution. In additon, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance.—Under the medical insurance program, the Secretary of Health, Education, and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carriers' principal function is to determine whether charges are allowable (reasonable) and to make payments.

The carrier selected by the Secretary of Health, Education, and Welfare to serve as an intermediary determines the allowed charges for bills submitted for each medical care service covered by the program and pays 80 percent of this amount after the $50 deductible has been met.

The allowed charge for the service may be paid to the patient, or the patient may assign the bill for collection to the physician or other supplier of the service if he is willing to accept assignment. In the former situation, the patient first pays the bill and submits the receipted bill to the carrier and is reimbursed, and, in the latter, the physician or other supplier submits the bill and is reimbursed. When the payment is made directly to the physician (or supplier) on assignment, the allowed charge determined by the carrier is the total charge. In both situations, the patient is responsible for the first $50 of the charges for covered services he receives during the year and the amount of the bill over 80 percent of the allowed charges.

The law instructs the carrier to consider the following criteria in determining the "allowed" charge:

(1) the customary charge for the service generally made by the physician or other person furnishing such services; and

(2) the prevailing charge in the locality by other physicians and suppliers for similar services.

The law also specifies that the "allowed" or reasonable charge cannot be higher than the charge applicable for a similar service rendered under comparable circumstances to the carriers' own policy holders or subscribers.

Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against the furnishing of unnecessary services to eligible individuals.

Most services covered by the medical insurance program are rendered on a fee-for-service basis. However, services furnished under group practice prepayment plans are normally rendered in return for predetermined premium payments. In recognition of the need for special adaptation of the Medicare payment procedures for services rendered by group practice prepayment plans, the law provides that an organization which furnishes medical and other health services (or arranges for their availability) on a prepayment basis, may elect to be paid 80 percent of the reasonable cost of services in lieu of 80 percent of the allowed charge for such services.

General Tables

Notes

Health insurance for the aged: The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over.

Type of coverage.—The program provides two types of insurance: a basic hospital insurance plan (HI) and a voluntary supplementary medical insurance plan (SMI).

Personal characteristics:

Age: In completed years at last birthday on the reference date of the table. A person is considered to have attained age 65 on the day preceding his 65th birthday.

Race: White, all other races, or unknown as entered into the HIE master file from basic records completed by the primary beneficiary. Race unknown, whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for a standard metropolitan statistical area (SMSA) if either of the following pertains: (1) there were 10,000 or more enrollees of all other races in the area in the hospital insurance program on July 1, 1967, or (2) at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex: As designated in the HIE master file.

Persons ever enrolled: All persons eligible for benefits under hospital insurance and/or supplementary medical insurance at any time during 1967.

Geographic classifications.—Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIE master file on January 3, 1969, regardless of the reference date of the table.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of 50 States, the District of Columbia, and residence unknown.

Other outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County.—The primary divisions of the 50 States are counties. In Louisiana, however, the divisions are known as parishes. Alaska is divided into 21 economic areas, included here as the equivalent of counties. A number of cities independent of county organizations are reported separately in Maryland, Missouri, and Virginia. In Virginia, data are not shown separately for Lexington, which became independent of Rockbridge County on January 1, 1966, and Emporia, which became independent of Greenville County on July 31, 1967. In Puerto Rico divisions are called municipios.

County unknown.—Persons whose mailing address does not permit identification of county of residence are included in figures for States, but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's, with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of SMSA's as classified by the Bureau of the Budget.[1] Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIE master file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

SMSA, Metropolitan SEA.—See above. Only areas in the United States are listed.
